(54) Title: METHOD AND DEVICE FOR THE PRODUCTION OF A COMPONENT, ESPECIALLY A HYBRID COMPONENT FOR A CROSSRAIL OF A VEHICLE, COMPONENT AND USE OF SAID COMPONENT

(54) Bezeichnung: VERFAHREN UND VORRICHTUNG ZUR HERSTELLUNG EINES BAUTEILS, INSBESONDERE EINES HYBRIDBAUTEILS FÜR EINEN QUERTRÄGER EINES FAHRZEUGS SOWIE BAUTEIL UND VERWENDUNG EINES BAUTEILS

(57) Abstract: The invention relates to a method for the production of a component (1) comprising a base body (2) which is at least partially covered in plastic (2), particularly a hybrid component, for a crossrail of a vehicle or a front-end-component. The base body (2) is made of at least two elements (2a, 2b) which are connected together on at least one connection point (8a, 8b, 8c, 8d). The inner wall of the base body (2) is covered with plastic (4) in such a manner that a cavity (H) is formed in the region of one of the connection points (8a, 8b) between the connection points (8a, 8b) and the plastic (4). The invention also relates to a component (1), especially a hybrid component, for a crossrail of a vehicle, comprising a base body (2) which is at least partially covered by plastic, said base body being formed from at least two elements (2a, 2b) whereon at least one of the connection points (8a, 8b, 8c, 8d) can be joined together. The inner wall of the base body (2) is provided with plastic (4) in such a manner that a cavity (H) is formed in the region of one of the connection points (8a, 8b) between the connection point (8a, 8b) and the plastic (4).
